Shiretoko

Shiretoko National Park is one of Japan's most beautiful and unspoiled national parks.

No roads lead further than about three fourths up the peninsula, and the northern tip can only be viewed from boats or be reached on multi-day trekking tours.

The peninsula is a home to a variety of wildlife, including brown bears, deer and foxes.

In winter, the peninsula's coast along the Sea of Okhotsk becomes one of the northern hemisphere's southernmost regions to see drift ice.
